## for retrofit installation

# HEA ND M16/600

Article no.: 1700050121, GTIN: 4052487178990

For retrofit installation in existing walls with perimeter insulation. The seal with the wall is made on both sides with a flat gasket which is pressed against the wall with nuts. A terminal lug with cross-clamp is used to connect flat and/or round steels.

Picture may differ from selected product

# **FACTS**

### **Advantages:**

- Retrofitting/renovation of earth systems
- Dry sealing system (without mortar)

# **Scope of delivery:**

• 1 piece Terminal lug and cross-clamp

#### **Dimensions:**

- Contact washer: Ø 72 mm
- Conductor core: M16 threaded rod
- Required drill hole: 20 mm
- For wall thicknesses up to 400 mm, thicker walls on request
- For perimeter insulation: up to 200 mm

# **Application range:**

• Waterproof concrete stress class 1

### **Material:**

- All metal parts: stainless steel V4A (AISI 316L)
- Seal: EPDM

## **Tests/Standards:**

- DIN 18014
- DIN EN 62305-3
- VDE 0185-305-3 (with lightning protection application)

# **FEATURES**

Maximum wall thickness:

600
